PROFESSIONAL SUMMARY

Results-driven third-year Computer Science Engineering student specializing in Data Science, with hands-on experience in Python, SQL, Machine Learning, and Data Analysis. Skilled in building end-to-end ML pipelines, conducting Exploratory Data Analysis (EDA), and developing interactive dashboards using Power BI and Tableau to convert raw data into actionable business insights. Strong foundation in Data Structures & Algorithms (DSA), Statistics, and Data Visualization, with a track record of delivering measurable results through AI-driven analytics. Seeking a Data Science / Data Analyst / Machine Learning internship to apply technical expertise and drive data-informed decision-making.

EDUCATION

KGISL Institute of Technology

B.E. Computer Science Engineering

CGPA: 7.5 / 10

Coimbatore, Tamil Nadu

Expected Graduation: 2028

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit
- **Machine Learning:** Regression, Classification, Predictive Modeling, Feature Engineering, Hyperparameter Tuning, Model Evaluation
- **Data Analytics:** Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, Probability
- **Data Visualization & BI:** Power BI, Tableau, Matplotlib, Seaborn
- **Databases:** SQL
- **Tools & Platforms:** MS Excel, Jupyter Notebook, VS Code, Git, GitHub
- **Core Computer Science:** Data Structures & Algorithms (DSA)
- **Core Competencies:** Problem Solving, Analytical Thinking, Critical Thinking, Communication, Collaboration

PROJECTS

DataMind AI — Natural Language Business Analytics Assistant

Technologies: Python, Pandas, NumPy, Scikit-learn, XGBoost, Prophet, SHAP, Plotly, Streamlit, FastAPI, PostgreSQL, SQL, OpenAI API, Docker

- Developed an AI-powered business analytics platform that enables users to upload CSV/Excel datasets and analyze them using natural-language queries.
- Built automated data cleaning, dataset profiling, EDA, statistical analysis, KPI generation, and interactive visualization workflows.
- Implemented machine learning capabilities including regression, classification, model evaluation, feature importance, anomaly detection, and time-series forecasting.
- Integrated SHAP-based explainable AI to interpret model predictions and generate actionable business insights and recommendations.
- Developed an interactive Streamlit dashboard with automated PDF reporting and cleaned dataset download capabilities.

INTERNSHIP EXPERIENCE

Data Science Intern — Yelkom Technologies

25 May 2026 – 25 June 2026

- Conducted Exploratory Data Analysis (EDA) on structured datasets using Python, Pandas, and NumPy to uncover key trends and patterns.
- Cleaned and preprocessed raw data by resolving missing values, duplicates, and outliers, improving overall data quality and reliability.
- Developed and evaluated machine learning models using Scikit-learn to support predictive analytics initiatives.
- Applied feature engineering and data transformation techniques to enhance model performance and accuracy.
- Queried and managed datasets using SQL to support in-depth analysis and reporting.
- Collaborated with senior mentors to gain hands-on exposure to the end-to-end machine learning workflow, from data collection through model evaluation.
- Documented key findings and communicated insights through structured reports and visual dashboards.

CERTIFICATIONS

- Probability & Statistics for Machine Learning & Data Science — DeepLearning.AI (Coursera)
- What is Data Science? — IBM (Coursera)
- Introduction to Relational Databases (RDBMS) — IBM (Coursera)
- Introduction to Tableau — Tableau Learning Partner (Coursera)
- Excel Basics for Data Analysis — IBM (Coursera)
- The Data Science Profession — University of London (Coursera)
- Cloud Computing — NPTEL

ACHIEVEMENTS

- Actively developing personal Machine Learning and Data Science projects using Python, Scikit-learn, Pandas, and SQL to strengthen applied technical skills.
- Participated in AI and Data Science workshops to deepen practical knowledge of machine learning and analytics techniques.
- Pursuing NPTEL Cloud Computing certification, targeting a score of 85%+.
- Continuously strengthening problem-solving and analytical skills through consistent coding practice on technical learning platforms.
